

“With the price of fuel I told my captains to maintain economy cruise - with my ShipTracks speed alarm I got an email when they were crossing the bay at high cruise. When I called them on it, they couldn’t figure out how I knew. Since then I’ve saved over 4,000 gallons per month - 8% in fuel economy.”

JIM BRANTER, MARINE TOWING OF TAMPA

BETTER DISPLAY • BETTER COVERAGE • BETTER PRICING

SHIPTRACKS is an AIS based tracking and management system that will transform the efficiency of all maritime shipping and service providers. With the click of a mouse you can track your vessels, your customer’s vessels or service

“For just \$99 a month I saved over \$200,000 in fuel cost with ShipTracks” vessel in real time. Whether your company has a few tugboats or you have a fleet of tankers, ShipTracks is an amazingly affordable management tool that will save you time, money and perhaps your business.

The days of tracking and managing by phone and fax are numbered. To be competitive you will have to use an online system with AIS technology. ShipTracks offers more simple to use customized features and options than any other AIS tracking and vessel management service, and at the industry’s best rate.

- CUSTOMIZABLE FEATURES TO BETTER FIT COMPANY OR INDIVIDUAL USE
- ESSENTIAL TOOL TO AID INVESTIGATIONS
- ENHANCE MARITIME DOMAIN AWARENESS
- EXPEDITE RESPONSE TO INCIDENTS AND REFERENCE FOR MORE ACCURATE INFORMATION
- PLAYBACK ANIMATED IMAGE OF VESSEL OR TERMINAL ACTIVITY
- MONITOR VESSELS REAL-TIME FOR SAFETY AND SECURITY PURPOSES
- INCREASE EFFICIENCIES FOR PORT AND FACILITIES PERSONNEL

CUSTOMIZE YOUR AIS WITH SHIPTRACKS

1::CUSTOMIZED ALARM ZONES::User-defined alarm zones for notice of arrival, departures and speed by automatic email.

2::CUSTOMIZED REPORT ZONES::Produce reports for arrivals and departures at ports or terminals. Draw reports from specific zones of interest.

3::CUSTOM CHART DISPLAY::Start with a world view and zoom to the dock. Also, toggle between screen views of (1) Google Satellite, (2) Google Street Map or (3) Nautical Chart.

4::REAL TIME INFORMATION::Integrated information from weather stations, mile markers, lock status and river stages.

5::SHARE THROUGHOUT COMPANY USERS::Share views, filters and alarms among different users in your group – this only needs to be created once and then it can be shared throughout your group.

6::CREATE MULTIPLE FILTERS & GROUPS::The ability to create multiple filters, list or groups of vessels to easily find your ships and information.

7::CONSTANT SITUATIONAL AWARENESS::Show tags/labels and historical tracks for all vessels or filtered version.

8::PRODUCTIVITY ASSISTANCE::Manage demurrage faster and more accurately, making the billing process more transparent.

9::INCIDENT INVESTIGATION::Historical playback of data - *all features active*. You have the ability to identify sources of dock damage, AtoN damage and spills.

10::SHIP NOTES & GROUP NOTES::Make notes about a vessel in your private database. Also, set up and maintain notes about vessels for every authorized member in your group – they can be edited and the edits are automatically stored in a database.

11::SECURITY::We can integrate any company's proprietary information into the system and place it behind your firewall – creating an intranet for your company.

2 Customized reports — about your vessels from your zones of interest.

(1) Google Satellite View
(2) Google Street View
(3) Nautical Chart

Only ShipTracks provides mile marker locations that let you know specific location info about your vessel.

Filter out info to show only your vessels info, data and even historical track.
